PROFILE SUMMARY

English-Japanese bilingual Software Engineer with 3.5 years of experience delivering enterprise software across full-stack development, DevOps, infrastructure, and AI-enabled solutions. Consistently recognised as a top-performing contributor through performance reviews and bonus evaluations within a 10-person engineering team supporting over 40 financial services clients. Trusted to lead business-critical projects, resolve complex production issues, and introduce modern technologies that improve both product capabilities and engineering efficiency. Experienced across C#, .NET, Angular, SQL Server, Azure DevOps, cloud infrastructure, and practical AI integration. Former university football team captain demonstrating leadership, teamwork, and communication in high-pressure environments.

PROFESSIONAL EXPERIENCE

Financial Risk Solutions (FRS) Ltd – Investment Administration Software Company Dublin/Ireland
Software Developer January 2024 - Present

- Independently designed and delivered a retail processing application for a major enterprise client, taking the solution from requirements through production deployment. The application became a core client workflow and is being expanded for adoption across additional clients.
- Led the delivery of AI-powered product capabilities using Azure AI Foundry, Azure AI Search, and Retrieval-Augmented Generation (RAG), enabling intelligent ingestion of client PDF documents into operational workflows and natural-language filtering of complex data grids.
- Implemented enterprise authentication and authorization features, including SAML-based Single Sign-On (SSO) integration for secure access across corporate client environments.
- Frequently assigned to resolve high-priority production incidents, including complex worker synchronisation and processing issues across application, database, and infrastructure layers.
- Delivered full-stack solutions across Angular, C#/.NET, SQL Server, DevExpress, Azure DevOps pipelines, and virtual machine environments.

Vyra – EdTeck Software Company Dublin/Ireland
Software Engineering Intern October 2023 - December 2023

- Developed and enhanced web application functionality using Python, Django, HTML, and CSS.
- Improved application quality through debugging, refactoring, testing, and technical documentation.

TECHNICAL SKILLS

Languages & Frameworks: C# | VB | .NET | SQL | Angular | JavaScript | TypeScript | Python | React | HTML/CSS

Cloud & DevOps: Azure DevOps | CI/CD | PowerShell | AWS | Virtual Machines | Git

AI & Productivity: Azure AI Foundry | Retrieval-Augmented Generation (RAG) | LLM Integration | GitHub Copilot | Prompt Engineering

EDUCATION

University College Dublin – Master of Science
Computer Science

Dublin/Ireland
September 2022 – December 2023

Meiji University – Bachelor of Engineering
Applied Chemistry

Tokyo/Japan
April 2017 – March 2022
